

*This part-whole model could also be represented with objects.*

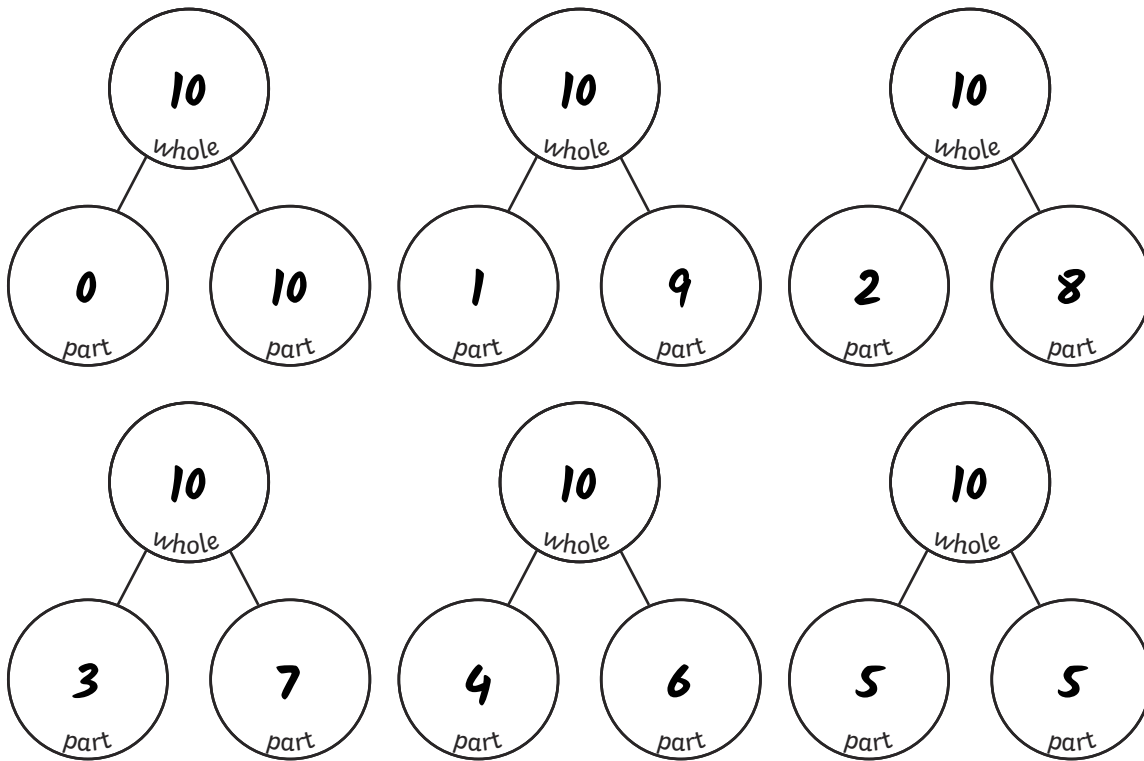

*In this part-whole model, the whole is 7, one part is 3 and one part is 4.*

George - true, there are five part-whole models where the whole is 8.

Magda - false, there are six part-whole models where the whole is 10.

Children find five correct ways of partitioning nine into three groups. They draw the ways in part-whole models.

Example:
